Medicare, insurance pay most patient hospital bills

Hospital administrators and citizens of the northwest sub-urban area share national con-cern over frising hospital costs. The Senate Judiciary Sub-committee on Anti-Trust and Monopoly Legislation plans to begin hearings on the problem next month. Local hospitals have been contacted by The Day to find out about sepects of the problem here.

Dream away a winter's day...

Dreaming of places to go, people to see, things to do, even though winter won't let you out of its icy grasp.

And you'll look pretty dreamy, yourself, in that softly swinging cape, pure and simple in unlined suede.

A cape for over-everything, for a walk on the moor--or a walk to the store.

For packing, wrinkle-free, and taking to faraway places, or maybe just back to school.

A way to look and feel romantic in boots or bells. It complements. It harmonizes. In fact, you and that go-places cape make great music together.

Talk with a teacher

One of our favorite "stories with a message" was written, if memory serves, by Voltaire. He met the Devil one day, it seems, and asked him, "With all the fine, noble ideas Man has had, how is it you have consinued to triumph so often?" The Devil smiled and replied, "Whenever a noble motive is born in the mind of Man, I simply pul it into his head to organize."

Can you heat a castle for \$200 a year with electricity?

If it's the six-room kind vou can.

According to the old saying, that's exactly what a man's home is—his castle. And if your castle happens to be the kind most people buy, namely, the six-room size, there are some things you ought to know about electric heat about electric heat.

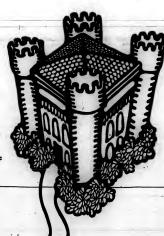

First of all, you should know that Commonwealth Edison has dramatically Commonwealth Edison has dramatically reduced electric heat rates over the past ten years. What's that mean? Simply that you should expect to pay less than \$200 a year to heat an average six-room house with proppr insulation.

Then, you shyuld know there's a definite trend to electric heat. Example: Over

25,000 families in Northern Illinois are beating electrically, and more than 5,000
new families are joining them every year.
That many people feel the price is small compared to the many benefits of modern electric heat.

No matter what size castle you have.

Dear Lee Janson.
Last summer I had a good job, but the company closed up. Do you know where I can find a job this year?

Advice Needed

Good for you. Start tooking now. First, check all the places within wailing distance of your beams. Notify all you present friends that you are looking for a job. Register with the State Employment Service. Check The Day want and. Talk with your khool counselor. Being far-sighted, you'll make it.

The other day I went out to apply for a job. The personnet guy

Sad, but true, he sets the standards for that company. If you tent the job, you have to meet his standards. Too mod, no job.

Turn into pastry bag with large plain tip. Pipe a 1-inch thick ring of chou paste about \$4\$ inch inside edge of dough circle.
